International Directory of Oil Spill Cleanup Contractors

Welcome to the Fifth Edition of the Little Black Book of Oil Spill Contractors, we would like to thank the many sponsors for making this directory possible.

The criteria for being listed in this book is very simple, if you offer an emergency oil spill service or can provide resources to help clean up and mitigate an oil spill you may be listed*. The listings are not for suppliers and manufacturers.

The intention of this directory is to list companies and response organizations that can be called upon in an emergency to assist with an oil spill. You can find more information on the services provided by following the web links on Cleanupoil.com.

As you can imagine this directory is quite an undertaking, please excuse any errors and omissions. We always welcome your feedback - feel free to contact us or join our forum. If you need additional copies you may order them on-line at Cleanupoil.com

Yours truly,

Stewart Ellis

**Do you care what your oil booms are made of?
YOU SHOULD!**

For the best in containment specify
Cooley
OIL BOOM FABRICS

COOLTHANE® Thermoplastic Urethane	Highly resistant to punctures, tears, abrasions, ultraviolet radiation, temperature extremes, hydrocarbons and a host of fuels and chemicals, Coolthane meets and exceeds the requirements of the containment industry for primary and secondary applications of fuels and other aggressive products.
COOLGUARD® COOLGUARD®HRL PVC/Evaloy®	Coolguard (24 ounce) is formulated with DuPont Evaloy®, which offers superior chemical resistance and high physical performance. Blending with Evaloy ensures outstanding durability in the most demanding environments.
COOLTHANE® BL Urethane/PVC	Coolthane BL is a specially engineered Urethane/PVC blend oil boom fabric. This slightly lower-cost option offers flexibility and durability as well as dimensional stability.

Cooley OIL BOOM FABRICS OFFER:

- Superior abrasion resistance
- High tensile and tear strength
- High puncture resistance
- Excellent dimensional stability
- High UV resistance
- Excellent fuel and chemical resistance
- Heat weldability (thermal fusion or RF)
- Evaloy® technology
- Variety of colors

The Cooley group offers the widest range of geomembranes available, including Coolthane® urethanes, Coolguard® with Evaloy®, Coolthane polypropylenes, polyvinyl chloride (PVC) and thermoplastic polyurethane (TPU).

Evaloy® is a registered trademark of DuPont. Coolthane® and Coolguard® are registered trademarks of the Cooley Group.
