

LAMOR

ENVIRONMENTAL SOLUTIONS

Founded in 1982, Lamor has established itself as a major market leader providing state-of-the-art oil spill response solutions, services, and equipment. The Finnish corporation has expanded its global presence in strategic markets, partnering with trusted associates, and investing in a range of companies to expand its environmental solutions capability.

Having response equipment on hand is a necessity in instances where there is a potential for an oil spill. Lamor has

composed rental packages that contain the necessary OSR equipment to effectively and efficiently respond to an incident.

The packages are scenario specific and include the highest quality equipment, e.g.:

- **Universal first response**
- **Fast response**
- **Drilling support/
Emergency offloading**

Excellence in Environmental & Emergency Solutions

Welcome to the Seventh Edition of the Little Black Book of Oil Spill Contractors, we would like to thank the many sponsors for making this directory possible.

This directory is recognized as a unique industry publication and has taken over a year to compile. We do our best to verify that companies listed are able to offer emergency oil spill services, however we also rely on the oil spill community for information and feedback. If we have missed anyone or you spot a mistake please contact us, this directory is valued by responders when dealing with oil spills. Approximately fifteen thousand books have been distributed throughout the oil spill industry over the years.

The criteria for being listed in this book is very simple, if you offer an emergency oil spill service or can provide resources to help clean up and mitigate an oil spill you may be listed*. The listings are not intended for suppliers or manufacturers.

As you can imagine this directory is quite an undertaking, please excuse any errors and omissions. We always welcome your feedback—feel free to contact us with changes or corrections. If you need additional copies you may order them on-line at Cleanupoil.com.

Yours truly,
Stewart Ellis

Performance Testing Begins at Ohmsett

At Ohmsett, testing and R&D opportunities abound! Our unique capabilities and realistic marine environment play an essential role in developing new technology that will be cleaning the world's water in the future.

Features & Capabilities:

- ❖ Full-scale testing, training and research
- ❖ Independent and objective testing with real oil
- ❖ Measurable and repeatable test parameters
- ❖ Chemical treating agents and dispersant testing
- ❖ Mechanical containment and recovery in ice
- ❖ Evaluation of remote sensing systems
- ❖ Test protocol development

Higea Technologies

Remove oil **not** water!

Higea's revolutionary ferrofluid solution magnetizes oil, allowing it to be easily separated and collected using our magnetic mechanical separation device. Higea's FOROS system allows for oil recovery and filtration without excess water, reducing the total water collection by volume to 1%.

Higea's filtration system can be automatically integrated with existing skimmers and pumps, improving oil pickup efficiency by reducing the amount of water collected. Less trips back to shore means a faster oil removal time and a cleaner ocean.

- ① Contaminated water is pumped on board the ship and into our separation module
- ② Water and oil are separated inside the module using our proprietary products
- ③ Separated crude oil is stored on board for later resale
- ④ Clean water is returned back into the ocean

💰 Lower Costs

SAFETYSORBENT & ACIDSAFE Indicating Neutralizer

*WYK Safety Sorbent
completely dries up spills
leaving your surface ready
for immediate use.*

*Slippery ramp, floor or deck?
Apply an anti-slip coating for
immediate traction.*

- Speeds thoroughness of cleanup
- Non biodegradable solidifying sorbent
- Meets landfill disposal requirements
- 100% mineral silicate/volcanic ash
- No clay or other contaminants
- Certified free of respirable silica

ACIDSAFE has the same cleanup and solidifying power of SAFETYSORBENT while neutralizing acids and providing a color indication of the PH showing when it's safe to pick up. *Now available in sock & pillow form!*

AX-11503

HEPACO

The image shows a white mobile containment unit with a worker in a white protective suit and hard hat on top, working with equipment. Another worker in a white protective suit and hard hat stands by the back of the unit. The unit has the HEPACO logo and contact information on its side. A license plate with the number AX-11503 is visible on the lower left side of the unit.

THE **SUPER SUCTION PUMP**

Truxor Amphibious Vehicle

MFP Boom

Outperforms the competition in high viscous debris laden liquids

Applications:

- > Beach/Shoreline cleanup
- > Skimmer offloading
- > Sludge removal from tanks
- > Pumping extremely high viscous liquids, corrosive chemicals & debris laden liquids
- > Deployment in remote area due to handling weight & portability

Other Products:

- > Portable pumps
- > Dispersant spray systems
- > Boom
- > Skimmers
- > Oil water separators
- > Recovery systems

Hanby Environmental

The original hydrocarbon and contaminant field-test kits for water and soil.

- Oil Spills
- Natural Disaster
- Chemical contamination

Hanby Field Test Kits are:

A uniquely designed "mobile lab" that test for TPH in water & soil by using a precise scientific method to produce colors to identify contaminants, both qualitatively and quantitatively. Hanby test kits are designed to save time and money by significantly reducing the dependence on off-site lab analysis.

PROVEN OIL SPILL RESPONSE EQUIPMENT

The Oil Spill Response solutions from DESMI are trusted throughout the industry. Whether the requirement is for offshore or the shoreline area, the Arctic or Equatorial environment, we continue to deliver proven solutions for all spill conditions at the best life cycle costs.

DESMI is the market leader for boom, recovery systems, burn kits and storage systems for oil spill response.

The world renowned Ro-Boom, which is available up to 3.5 metres in height, is unsurpassed in its manufacture, operation and longevity. It can be supplied in containerised, standard systems with DNV certification, ideal for deep water offshore operations. Ro-Boom continues to set the standards for containment and deflection in the challenging offshore environments.

With DESMI Oil Spill Response you get it all!

A full range of state of art equipment for Nearshore, Offshore and Deep water requirements:

- Booms
- Skimmers
- Pumps
- Floating storage barges
- Dispersant Spray Systems
- Workboats

INTERNATIONAL
SPILL CONTROL
ORGANIZATION

WORKING FOR YOU!

Be part of the worldwide fraternity of spill response professionals.

Get the free weekly newsletter to keep you up-to-date on events, developing technologies, new legislation and other matters of mutual interest.

Tell the world about your products and services.

Through practical involvement in supporting the implementation of the IMO OPRC convention and the OPRC HNS Protocol, ensure your role in the manufacturing and service support infrastructure needed for successful implementation.

Get practical help in building incident response capacity and competence enhancement.

Identify opportunities to develop alliances and technical partnerships with other members as a means of fast-tracking response capacity building.

Have the right to display the ISCO logo on your headed notepaper, brochures, and web site to show that you are part of an international organisation dedicated to improving worldwide co-operation and preparedness.

*ISCO is the only worldwide organisation
for spill control professionals.*

ISCO exists for you – Join ISCO today!

Visit www.spillcontrol.org for more information

The Best in Chemical Containment

OIL BOOM FABRICS

COOLTHANE®

Thermoplastic Urethane

Meets and exceeds the requirements of the containment industry for primary and secondary applications of fuels and other aggressive products. Meets the current US Navy specifications for Lightweight Response and Heavyweight Permanent Boom. Available in 28, 80, and 100 oz.

COOLTHANE®

with Kevlar® Fabric

Utilized in lightweight boom applications that require durability and ballistic properties for puncture-resistance.

COOLGUARD®

Elvaloy®/PVC

Formulated with DuPont Elvaloy®, ensuring superior chemical resistance, high physical performance, and outstanding durability. Available in potable water grade.

TXN®

PVC-Coated Polyester Tarp

Unique design of PVC-coated polyester used in oil booms, truck tarps, bulk bags, flexible tanks, roll-up doors, dock shelter, and jumping balloons. Available in 18, 22, and 40 oz.

FEATURES:

Superior abrasion resistance • High tensile and tear strength • High puncture resistance • Excellent dimensional stability • High UV resistance • Excellent fuel and chemical resistance • Heat weldability (thermal fusion or RF) • Elvaloy® technology • Variety of colors

MADE IN THE U.S.A.
